

# HEALTHY RETAILING

Supporting your business through Covid-19

As we get accustomed to a new normal with COVID-19, PNH Solutions is committed to making the transition as easy as possible. Our Healthy Retailing product line aims to help you promote your store re-opening and create a safe environment for both your employees and your customers.

More than ever, we believe the right products can inspire the best actions.

## About

PNH Solutions is a large format print service provider and custom hardware manufacturer that specializes in turn-key marketing products for events, retail environments, exhibits and trade shows. By closely collaborating with our clients during every stage of the design and fabrication process, we develop, entirely in-house, functional and award-winning products that blend cutting-edge large format print, metalwork, millwork and LED technologies.

# Flags

- Single or double-sided custom-printed graphics on dye-sub fabric
- Different sizes and styles available
- Each flag kit includes a dye-sub flag, modular pole system and carry bag
- Different bases available: x-bases, tire flag bases and in-ground stakes

# Barricade & Fencing Covers

- Single or double-sided custom-printed graphics on dye-sub fabric or vinyl
- Specifically designed for plastic/steel barricade/fence
- Optional grommets and reinforced webbing strengthen banners and facilitate installation

# Sandwich board and Springer Signs

## Sandwich board

- Single-sided custom-printed graphics on rigid plastic
- Holds two 24" W x 36" H signs
- Durable plastic frame with quick-change feature
- No velcro, screws or tape required

## Springer Signs

- Single-sided custom-printed graphics on rigid plastic
- Holds two 24" W x 36" H signs
- Specifically designed for the outdoors
- Heavy-duty spring-loaded banner bracket system
- Plastic base can be filled with water or sand for extra stability
- Handle and wheels on the base facilitates transport
- Quick and easy set-up with no tools required

Flexi Tower

- Custom-printed graphics on dye-sub fabric - available on 2 to 3 panels
- Many sizes available, in different shapes (horizontal, vertical, round, tower)
- Easy to install – no tools or assembly required
- Carry bag included

Horizontal Flexi Sign

# Automatic & Manual Pump Dispenser Stands

## Automatic Hand Sanitizer Dispenser Stands

- 12" silver powder-coated square steel base, secures to upright with 1 screw from bottom
- Fixed 47 ½" H silver powder-coated square aluminum upright (total height with sign: 65 ½")
- Back plate secures touchless dispenser in place with 4x threaded holes for bolts
- Touchless dispenser with 2 infrared motion sensors using 4x C batteries (not included)
- Dispenser holds about 1 liter of gel (not included) – good for 500 drops
- Optional sign, printed on ¼" thick rigid media

## Manual Pump Hand Sanitizer Dispenser Stands

- 12" silver powder-coated square steel base, secures to upright with 2 screws from the side
- Fixed 42" H silver powder-coated square aluminum upright (total height variable depending on sign)
- 4" square steel tray with 2" H lip secures to top of upright with screw from above – works with hand sanitizer bottles up to 4" W x 3.5" D
- Knob in tray tightens bottle in place and reduces movement
- Different snap frame sign sizes available

# Line-Up Shelters

- Single or double-sided custom-printed graphics on dye-sub fabric
- Water-repellent, fade-resistant and fire-rated fabric
- Durable steel frame 4' or 5' W x 7.5' H, with a 34" overhang
- Optional clear plastic flyer holders to promote your weekly specials, menu or seasonal campaign
- Professional installation required, as the base screws into asphalt or cement
- Layout, logistical and site services available

# Reusable Fabric Face Masks

**Promote your brand name, logo or message, while offering the best protection available for your frontline personnel with our certified, medical-grade level 3 reusable fabric face masks!**

## Features:

- Combined with a filter (sold separately), our masks are medical-grade level 3 certified, as they meet the ASTM F21100-19 requirements. As the highest attainable level of medical-grade masks, they offer the maximum barrier protection for any situation that has the potential for exposure to heavy levels of aerosols, sprays, fluids and blood.\*
- Create one or more graphic designs with your logo, slogan, company colors, etc. We also offer stock designs with either patterns or solid colors. Buy in bulk and save!
- As we print the graphics through a dye-sublimation process, they are embedded (sublimated) into the fabric – wash them in the washing machine and reuse them, without the graphics fading, cracking or peeling.
- Each mask has 3 layers: a heavier printed polyester fabric on the outside, a removable filter and a lighter polyester sleeve for the filter. The filter covers the nose and mouth to provide the protection you require, while keeping you cool and breathing easily.
- Made with OEKO-TEX® compliant fabric\*\* and water-based inks that are free of harmful substances and do not cause any skin or eye irritations.
- The filter is removable and also machine washable. It is rated for 2 to 5 day use in environments with average pollution. The length of use between washes is a personal matter and up to each individual. Replacement filters sold separately in packs of 10.
- With 4 sizes available (S, M, L & XL), 3 layer construction & 2 finishing options (2 elastic headbands with toggles or ear loops), our masks remain comfortably in place.
- Packaged in a convenient carry pouch.
- Made entirely in Canada.

\* Following the ASTM F21100-19 requirements, the PNH Reusable Fabric Face Mask, with a filter, passed the medical-grade level 3 barriers of the following tests: Bacterial Filtration Efficiency, Differential Pressure, Sub-Macron Particulate Filtration Efficiency at 0.1 micron, Synthetic Blood Penetration and Flame Spread. Independent test results available upon request.

\*\* Our masks are made of fabric that has the OEKO-TEX® Standard 100 label, meaning that it has been tested for harmful substances. The test was conducted by an independent OEKO-TEX® partner institute on the basis of an extensive OEKO-TEX® criteria catalog. In the test they take into account numerous regulated and non-regulated substances, which may be harmful to human health. In many cases the STANDARD 100 goes beyond national and international requirements.
